

ergoflix Group GmbH · Marktstr. 20 · 46499 Hamminkeln

26.03.2026

IATA Certificate

In accordance with the 67th edition of the IATA Dangerous Goods Regulations (effective Jan. 1, 2026, valid until further notice), Table 2.3.A "Provisions for dangerous goods carried by passengers or crew" (Subsection 2.3), airline approval is required for battery-powered mobility aids equipped with lithium-ion batteries.

The mobility aid registered for transport—an electric wheelchair—is classified as a means of transport under UN 3556 "Vehicle, lithium ion battery powered, Class 9." The wheelchair's battery is removable, complies with all applicable IATA DGR regulations, and has the following watt-hour rating:

- ergoflix® LX 144 Wh
- ergoflix® vario 300 Wh
- ergoflix® carbon 288 Wh
- ergoflix® basic (12 Ah battery) 288 Wh
- ergoflix® basic (11.6 Ah battery) 278.4 Wh

Please note that even with the presentation of this confirmation, there is no guarantee that the airline will not raise further questions or refuse transport. This decision rests with the airline.

Kind regards,

ergoflix Group GmbH
