An interview with Petra, an ergoflix tester

Flexibility

Handy folding mechanism

The ergoflix® LX can be folded away in a matter of seconds with just a few simple steps. This means you can store it away to save space and take it with you when travelling.

- Operate the lever at the back of the wheelchair and push the backrest gently forwards.
- Grab the footrest and pull it towards the backrest. And just like that, the wheelchair is folded up compactly.

Design

Colour selection

Prefer something bold or understated? The choice is yours! Our ergoflix® LX is available in two colour options. So not only can you count on the very best comfort, but you can also choose the design you like best.

Available in the following colours:

Red

White

ergoflix

Well-thought-out design – from the dot on the 'i' to the armrest.

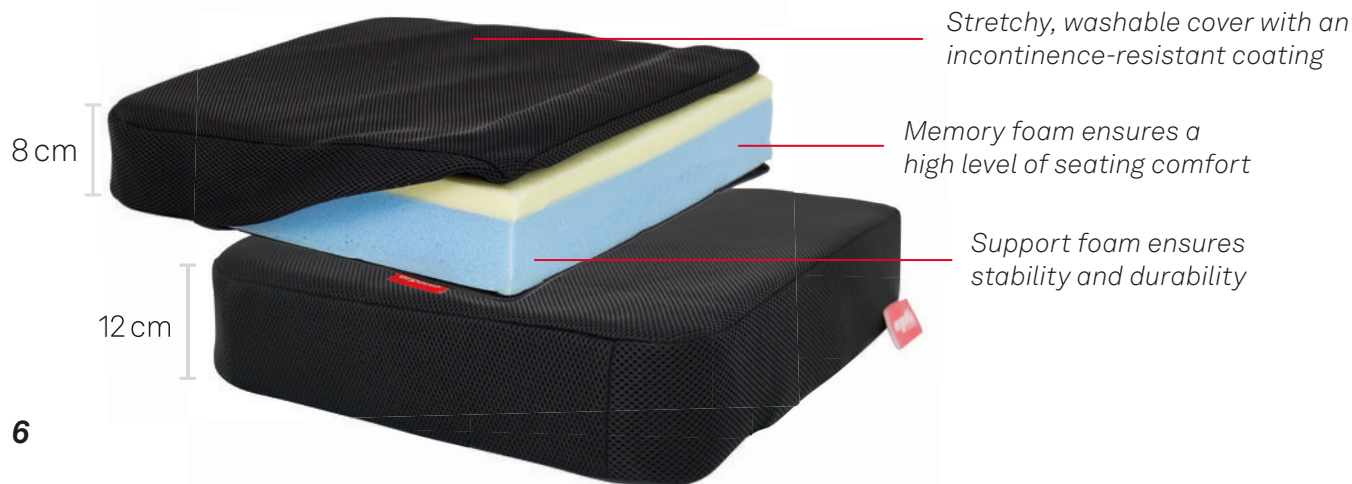

Comfort

For your wellbeing

Here at ergoflix, we firmly believe that your mobile companion should offer you the greatest possible comfort. And because comfort is always a personal matter, you can customise the ergoflix® LX to suit your preferences. Decide for yourself which add-ons will make your wheelchair the perfect everyday companion

Comfort seat cushion

- Developed in collaboration with experts in seating aids
- Tried-and-tested memory foam technology

Height adjustment for armrest

- Optimises your sitting position and relieves pressure on your shoulders and neck
- Two selectable height settings (33 mm and 43 mm) on each side (right and left)

Footrest | extendable

- Can be folded up and extended in three stages by up to +10 cm
- Non-slip mat

Seat width extension

- The seat width can be extended by 8 cm using an adapter

Height-adjustable backrest

For the best possible comfort

Would you like to adjust the height of the backrest on your ergoflix® LX to suit your needs? No problem! The backrest can be adjusted in four stages from 48 cm up to 55 cm, providing noticeable support. This means you can enjoy maximum riding comfort, whatever your height.

Good to know: Recesses on the sides of the upper section allow you to attach accessories to the backrest.

The breathable backrest padding on the ergoflix® LX offers you a generous support surface, allowing you to lean back and relax whilst enjoying maximum support.

Intuitive controls

For maximum independence

Thanks to the intuitive control module, you can simply get on board your ergoflix® LX and set off. You'll get the hang of the controls in no time at all, ensuring a safe driving experience and a relaxed, enjoyable ride right from the start.

The control module for the ergoflix® LX was developed based on customer feedback. It combines state-of-the-art technology with maximum user-friendliness.

The loud horn ensures you get noticed when you're out and about.

Further highlights:

- Colour LCD display
- Battery level indicator
- USB port for charging mobile phones
- Lighting control at the touch of a button
- Distance travelled display
- Various joystick attachments, such as the T-fork and comfort knob, are available in the range of accessories

Optional retrofit:

Swivel arm for control module

- For swivelling the control module to the side
- Allows the unit to be positioned close to tables
- Easy to fit

Control module adapter for caregivers / flex

- Enables a caregiver to control the wheelchair
- Easy to attach to the push bar
- Flexibly adjustable in height and position

High-performance engines

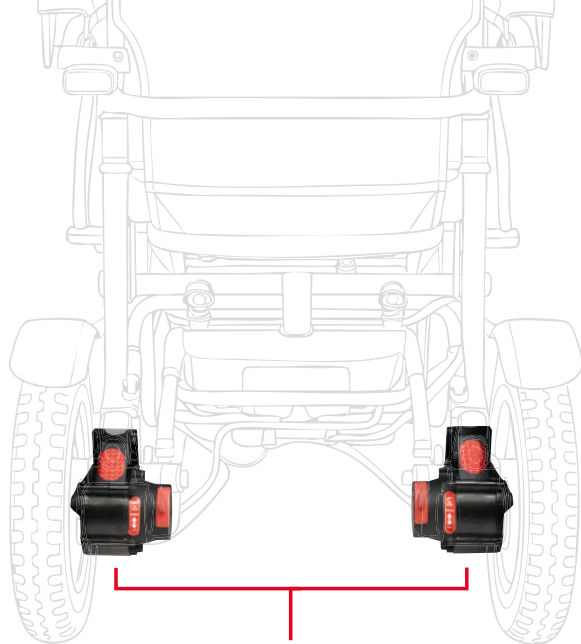

For maximum power

The ergoflix® LX is fitted with a sine-wave drive. This state-of-the-art technology offers you an extremely quiet and exceptionally smooth ride. The drive responds precisely, giving you the best possible control on any route.

Another advantage: the brushless motor is maintenance-free and impresses with minimal wear, high efficiency and high speed.

**Top-class, quiet power:
For long-lasting driving
pleasure without compromise!**

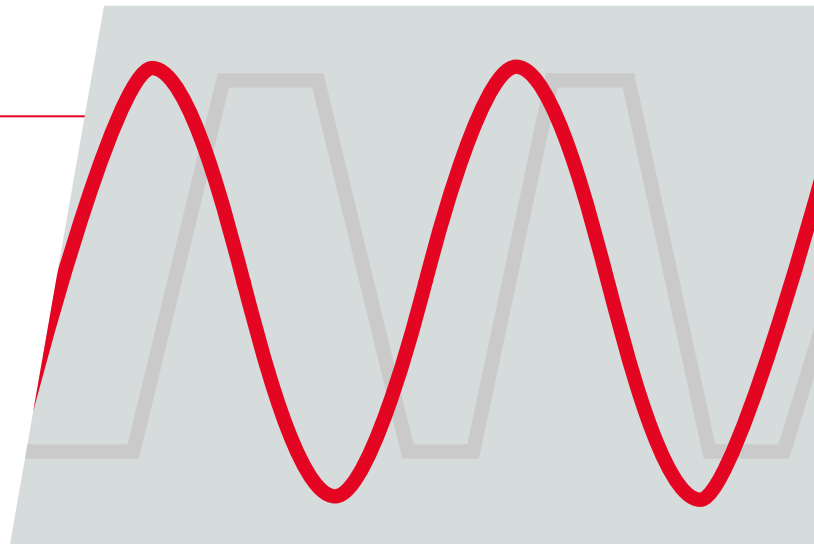

**Position of the
engine unit**

Further highlights:

- Smooth acceleration and a steady ride**
- An extremely quiet and vibration-free ride**
- Durability thanks to a gentle power supply**

The sine-wave drive generates wave-like movements. These are perceived as particularly smooth and offer a noticeably more comfortable ride than conventional motors.

- Power transmission
Sine-wave drive**
- Power transmission
conventional drive system**

Lighting at the touch of a button

For even greater visibility with the ergoflix® LX

The ergoflix® LX is fitted with integrated lighting. Two fixed front lights and two fixed rear lights can be switched on and off very easily at the touch of a button. For ease of use, the switch is located directly on the control module.

Technical details:

- StVZO-certified
- No charging required
- Maintenance-free

one switch
for four lights

Lights on. Risk off.

Stay safe on the road, even in the dark

We make safety simple: the ergoflix® LX's integrated lighting doesn't need to be charged separately, as the light modules are powered by the wheelchair's battery. This means you can travel safely at all times.

For anyone who wants to get ahead safely.

For added visibility, the black rims are fitted with reflective elements. The design is both stylish and practical, ensuring you are more easily seen by other road users in the dark.

Lithium-ion batteries

For maximum range

The lithium-ion batteries provide the ergoflix® LX with the power it needs for your outings. The batteries can be removed very easily at the push of a button. When fully charged, you'll have a range of up to 25 kilometres.

You can easily check the battery charge level using the **charge indicator**. This means you can always keep an eye on your remaining range.

Further highlights:

The lithium-ion batteries...

- Can be stored, charged and transported separately.
- Are approved for carriage on aeroplanes.
- Are ready for use again after a charging time of 3 hours per battery.

The ergoflix[®] LX

Highlights at a glance

Extended warranty

For your ergoflix® LX

Our products are subject to strict quality controls and stand out for their high-quality workmanship. They are low-maintenance, reliable and durable. And because we are confident in the quality of our products, we offer you extended warranty cover for the ergoflix® LX.

- **Battery¹: 3 years**
- **Control module, motor, control unit: 3 years**
- **Frame: 3 years**

¹ A battery is considered defective if, within 3 years of the date of purchase, it can be demonstrated to have less than 65% of its capacity when fully charged. The period begins on the date of purchase.

With the multi-year warranty for the ergoflix® LX, you're covered should the worst happen. You can rely on us to provide you with prompt and reliable support.

Together with our more than 800 medical supply partners, we're here for you!

Do you want to save a large part of the costs?

Make sure you get your health insurance subsidy

1 Medical prescription

The first step towards receiving a health insurance subsidy is to see your doctor. If your doctor confirms that you need a mobility aid, they will issue a prescription – similar to a standard medical prescription. The prescription should state the diagnosis, e.g. ‘immobility’ or ‘gait disturbance’.

2 Getting in touch with ergoflix

As soon as you have received your doctor’s prescription, please feel free to contact us – by telephone or email. Together, we will arrange a personal consultation at a medical supply shop near you. There, you will find the ergoflix wheelchair that’s right for you.

3 Submitting the documents

The medical supply shop will submit all the documents to your health insurance provider. They will review the application and then get in touch with you. Once approved, you will receive your ergoflix and can contact your medical supply shop directly with any queries regarding your wheelchair.

Sample recipe

Good to know: The medical aid number for the ergoflix® LX is 18.50.07.0007.

Note for privately insured individuals

The process for private health insurance companies differs from the statutory procedure in a number of respects. Here, too, it all begins with a doctor's prescription and a consultation at a medical supplies shop. You will then receive a quote. You submit this to your private health insurance provider. Once approval has been granted, you can order your ergoflix straight away.

Do you have any questions about your application for assistive equipment, or would you like to appeal against a rejection? Please email us at **krankenkasse@ergoflix.de** or simply call us on **+49 2852 9459094**.

We'd be happy to help you apply for your medical aid. Our experts are very familiar with the health insurance companies' procedures.

Personal test drive

Free of charge and with no obligation

Discover the ergoflix® LX

At ergoflix, you can try out your future companion free of charge: on a date of your choice, one of our certified medical device advisers will visit you at home, explain the wheelchair's features and answer all your questions. You can then test the wheelchair right there in your own home.

You're also welcome to seek advice at a medical supply shop near you. We work with over 800 partners across Germany.

Booking a test drive

We'll work together to find a suitable time.

To book your test drive, simply call us on
+49 2852 9459000.

Staying mobile whilst on the move

Travelling by air with your ergoflix® LX

Preparing for your journey

To ensure you can set off on holiday comfortably with your wheelchair, you'll need a few documents. You can find these at **ergoflix.de/download**. Simply download the documents and send them to the airline by email before your journey, or hand them over in paper form.

Getting on the plane

After check-in, simply hand in your folded ergoflix® LX at the counter for large and bulky luggage.

Service at the airport

If you have reduced mobility, a special service is available to you: on request, an airport member of staff will accompany you from check-in to the aircraft. The cabin crew on board will also be happy to assist you during the flight.

Finally independent again

My ergoflix story

»I've gained an incredible amount of freedom and can do things that wouldn't be possible with a manual wheelchair.«

Petra E., Ladbergen (NRW), Product tester

Petra, an ergoflix tester

an interview

Whether it's a festival site or the office – Petra is always right in the thick of things with her ergoflix® LX. She relies on a wheelchair due to a rheumatic condition. But rather than letting this hold her back, she has discovered a whole new level of freedom with her foldable electric wheelchair. Today, Petra uses her ergoflix not only in her everyday life, but also as a real-world tester for ergoflix.

Dear Petra, what's the first thing that springs to mind when you think of your ergoflix® LX?

Definitely a better quality of life. I've gained an incredible amount of freedom and can do things that wouldn't be possible with a manual wheelchair. The folding mechanism, in particular, is something quite special. I simply pop my ergoflix into the car and take it with me wherever I go.

Thanks to the ergoflix® LX, I'm independent and can decide for myself what I want to get up to. I can even tackle long distances and changes in elevation with ease, without having to exert any effort myself. I simply love that feeling.

Do you have any favourite accessories for your ergoflix® LX?

Yes, I have two. I find the swivel arm for the control module very helpful. It allows me to easily move the module to the side, so I can get even closer to tables. This helps me a lot, for example, when working at a desk or when visiting restaurants. My second favourite accessory is the universal holder, whose magnetic fastening system I find absolutely brilliant. I use the integrated mobile phone holder and the two matching ergoflix wheelchair bags regularly, in particular.
